

What are Panic Attacks?

Panic attacks are very intense, frightening, and unpredictable spikes in anxiety. Panic disorder is when people develop anxiety about having panic attacks. Panic disorder can stop people from trying new things, going to certain places or leaving their home. Fortunately, it responds very well to treatment.

An Online Treatment for Panic

Panic disorder can be effectively treated with internet-delivered Cognitive Behaviour Therapy (iCBT). Just like face-to-face therapy, iCBT can teach you strategies for managing the frightening thoughts and sensations that come with panic. iCBT is accessible from most devices, meaning you can access treatment at a time and place that suits you.

What does the course involve?

The Panic Attacks Course by THIS WAY UP is an evidence-based iCBT course. Across six lessons, this course will teach you:

What panic attacks are and how they work

How to manage panic symptoms

Ways to overcome unhelpful thoughts

Confidence in anxiety-provoking situations

Strategies for staying well in the long-term

We're here to support you on your journey to better mental health. Learn more about the Online Course for Panic at thiswayup.org.au
